

# Sprint 1

The screenshot shows the 'Your Profile' section of the CareerPath application. At the top, there are tabs for 'My Profile' (which is active) and 'Career Assistant'. On the right, there are user profile icons and a 'Sign out' link. Below the tabs, the title 'Your Profile' is displayed, followed by the sub-instruction 'Manage your professional information to get better recommendations.' To the right of this text is a 'Edit Profile' button. The main area contains four rectangular boxes, each with a small icon and a title: 'Education' (with a graduation cap icon), 'Experience' (with a briefcase icon), 'Skills' (with a lightning bolt icon), and 'Interests' (with a heart icon). Each box contains the placeholder text 'No [category] details added yet.'

This screenshot shows the 'Your Profile' section in edit mode. The layout is identical to the previous screenshot, with tabs for 'My Profile' and 'Career Assistant', and a 'Sign out' link on the right. The 'Edit Profile' button is also present. The main area now features expandable input fields for each category. The 'Education History' field has a placeholder 'e.g. BSc Computer Science, Stanford University (2020-2024)' and a note below it: 'List your degrees, schools, and graduation years.' The 'Work Experience' field has a placeholder 'e.g. Software Engineer Intern at Tech Corp (Summer 2023)' and a note below it: 'Include roles, companies, and key achievements.' The 'Skills & Technologies' field has a placeholder 'e.g. JavaScript, React, Python, Data Analysis, Project Management' and a note below it: 'Separate technical and soft skills with commas.' The 'Career Interests & Goals' field has a placeholder 'e.g. I want to become a Full Stack Developer or AI Engineer.' and a note below it: 'What kind of roles are you looking for?'. At the bottom right of the input area are 'Cancel' and 'Save Profile' buttons.

hello

Hi! What's your name?

my name is Andreea

Hello Andreea! How can I assist you today?

What are the best IT certifications to have?

Are you interested in software development, networking, or cybersecurity? Each has its own set of required skills.

CYBERSECURITY

for cybersecurity domain

The field of cybersecurity is rapidly growing, and obtaining certifications can significantly enhance a professional's credibility and marketability.
